

EXPERIENCE

Product Designer, Invoice Simple • EverCommerce

Apr 2023 - Present, Toronto, ON

Leading end-to-end payments and growth design initiatives for an iOS, Android and web-based invoicing platform serving 500K+ small business owners worldwide

Driving design and usability testing for payments automation, tap to pay and cheque image capture workflows, targeting 15%+ lift in total payments volume

Redesigned user activation journey through identifying drop-off patterns and A/B testing, growing free-to-paid conversion by 38% and recurring revenue by \$1.5M+

Piloted novel free trial experience to augment feature discovery, increasing document creations by 27% and driving 10% skew towards higher-tier subscription packages

Audited and refined layout, colour palette, and type hierarchy of mobile app interface, achieving AA-level compliance with WCAG 2.2 standards

Product Design Intern, QuickBooks Payments • Intuit

May - Aug 2022, Toronto, ON

Led end-to-end design initiatives for customer-facing checkout experience, introducing 2 new payment channels and powering \$300M+ in transactions daily

Conducted 2 rounds of contextual inquiries and A/B testing to identify pain points within user journey and validate competing design solutions

Orchestrated design thinking workshops involving 10+ cross-functional stakeholders to prioritize product requirements and accelerate roadmap alignment

UX Design Intern, Innovation Lab • Interac Corp.

Sep - Dec 2021, Toronto, ON

Designed and piloted industry-first minimum viable experiences (MVEs) for integration into a banking network that connects 200+ financial institutions across Canada

Championed company-wide adoption of UX best practices by incorporating design thinking methodologies in the execution of 3 proof of concept (POC) initiatives

Product Design Intern, Grocery Fulfillment • Loblaw Digital

Jan - Apr 2021, Toronto, ON

Streamlined fulfillment operations by leading end-to-end design of a pick history module used Canada-wide to validate online orders across 13 grocery store chains

Completed 3 rounds of usability testing to qualitatively assess ease of fulfillment status identification and item staging time confirmation
