

EXPERIENCE

Product Designer, Invoice Simple • EverCommerce

Apr 2023 - Present, Toronto, ON

Building mobile and desktop experiences for Invoice Simple Payments and Growth, empowering 500K+ small businesses in their day-to-day operations

Leading end-to-end design and usability testing of payments automation, tap to pay and cheque image capture features, targeting 15%+ lift in total payments volume

Redesigned user activation journey by identifying funnel drop-offs and conducting A/B testing, growing free-to-paid conversion by 38%

Piloted free trial experience to augment feature discoverability, increasing document creations by 27% and driving 10% skew towards higher-tier subscription plans

Audited and refined layout, colour palette, and type hierarchy of mobile app interface, achieving AA-level compliance with WCAG 2.2 standards

Product Design Intern, QuickBooks Payments • Intuit

May - Aug 2022, Toronto, ON

Led design iterations to the QuickBooks online payment portal, introducing 2 new payment channels to a platform that powers \$300M+ in daily transactions

Validated competing solutions through 2 rounds of contextual inquiries and usability testing, uncovering payor pain points within checkout flow

Facilitated design thinking workshops involving 10+ cross-functional stakeholders to prioritize product requirements and accelerate roadmap alignment

UX Design Intern, Innovation Lab • Interac Corp.

Sep - Dec 2021, Toronto, ON

Designed and piloted minimum viable experiences (MVEs) for open banking integration within a network of 200+ financial institutions across Canada

Incorporated user research methodologies in the execution of 3 proof of concept (POC) initiatives, establishing processes adopted by the innovation lab

Product Design Intern, Grocery Fulfillment • Loblaw Digital

Jan - Apr 2021, Toronto, ON

Led end-to-end design of a pick history module deployed Canada-wide across 13 grocery store chains, enabling fulfillment associates to track and validate orders

Conducted 3 rounds of usability testing, surfacing status visibility and readability pain points that informed pre-launch design iterations
